INTERNAL RISK FACTORS

1. ***The novel coronavirus pandemic (COVID-19 Pandemic) outbreak and steps taken to control the same have significantly impacted our business, results of operations, financial condition and cash flows and further impact will depend on future developments, which are highly uncertain.***

The rapid outbreak of the COVID-19 Pandemic, resulted in an unpredictable chain of events across the globe. With reduced production and consumption, every economy witnessed a fiscal crunch like never before. The pandemic shook the Indian economy, which was already under the effects of demonetisation and GST enforcement. As Covid-19 Pandemic swiftly made its way into the nation, the Indian Government imposed a strict nationwide lockdown. Trade and travel restrictions along with shutdown of business activities led to a GDP contraction of 23.9%.

The financial year 2020-21 began with ongoing COVID-19 Pandemic that led to nationwide lockdown. The lockdown was relaxed in a phased manner depending upon the severity and magnitude of the spread of the pandemic. The cases started declining after reaching peak levels in September 2020. With revival of economic activities due to easing of lockdown, economy rebounded. However, the resurgence of COVID-19 Pandemic impacted the nascent economic revival that was taking shape. The most vulnerable category of borrowers are individual borrowers, small businesses and MSMEs.

Our Company also lends to MSMEs. In order to mitigate the stress caused by the Covid-19 Pandemic on several sectors across the country, the Government has announced an Emergency Credit Line Guarantee Scheme ("ECLGS"). The ECLGS aims to provide 100 percent guaranteed coverage to the banks, non-banking financial institutions (NBFCs) and other lending institutions in order to enable them to extend emergency credit to business entities that have suffered due to the COVID-19 Pandemic and are struggling to meet their working capital requirements. The scheme aimed to provide Rs 3 lakh crore worth of collateral-free, government-guaranteed loans to micro, small and medium enterprises (MSMEs) across India to mitigate the distress caused by the coronavirus-induced lockdown.

RBI took several standard and innovative measures to ensure liquidity in the system. RBI permitted lending institutions to provide relief to the borrowers for a period of six months starting from 1st March 2020 to 31st August 2020 from EMI payments and working capital interest payments. It also announced relief measures including new restructuring guidelines to retain loans from banks and NBFCs' to such qualifying loans classified as standard within the regulatory framework. RBI also declared Resolution Framework for COVID-19 Pandemic related stress through which a window to enable lenders to implement a resolution plan in respect of eligible corporate exposures without change in ownership, and personal loans, while classifying such exposures as Standard, subject to specified conditions. Reserve Bank of India vide its circular dated 7th April 2021 instructed all lending institutions to refund / adjust 'interest on interest' to all borrowers including those who had availed of working capital facilities during the moratorium period, irrespective of whether moratorium had been fully or partially availed or not availed.

Given that the COVID -19 Pandemic and its impact on the Company, the actual impact on our Company's loans and advances will also depend on future developments, including, among other things, any new information concerning the severity of the COVID -19 Pandemic and any action to contain its spread or mitigate its impact. While, our Company continue to monitor the developments of the COVID-19 Pandemic situation closely, assess and respond proactively to minimize any adverse impacts on the financial position, cash flows and operating results of our Company, it is possible that the Company's business, financial condition and results of operations could be adversely affected due to the COVID-19 Pandemic. If the COVID-19 Pandemic situation persists or worsens, it may adversely impact our Company's business and the financial condition.

As these are unforeseen circumstances, it may give rise to risks that we may not have anticipated. If the outbreak of any of these pandemic or other severe pandemic, continues for an extended period, occur again and/or increases in severity, it could have an adverse effect on economic activity worldwide, including India, and could materially and adversely affect our business, cash flows, financial condition and results of operations.

2. ***We are subjected to supervision and regulation by the RBI as non – deposit accepting NBFC, and changes in RBI's regulations governing us could adversely affect our business.***

The RBI's regulation pertaining to NBFC may change or become more rigorous in the future which may require our Company to restructure its activities, incur additional costs or could otherwise adversely affect its business, financial performance and cash flows. There can be no assurance that the RBI and/or the Government will not implement further regulations or policies, including legal interpretations of existing regulations, relating to or affecting interest rates, taxation, inflation or exchange controls, or otherwise take action, that may have an adverse impact on NBFCs.

Compliance with many of the regulations applicable to our operations in India, including any restrictions on investments and other activities currently being carried out by us, involves a number of risks, particularly in markets where applicable regulations may be subject to varying interpretations. If the interpretation of the regulators and authorities varies from our interpretation, we may be subject to penalties and our business could be adversely affected. We are also subject to changes in laws, regulations and accounting principles and practices. There can be no assurance that the laws governing the financial services sector will not change in the future or that such changes or the interpretation or enforcement of existing and future laws and rules by governmental and regulatory authorities will not adversely affect our business and future financial performance.

3. ***We depend on the accuracy and completeness of information about customers and counterparties for certain key elements of our credit assessment and risk management process. Any misrepresentation, errors in or incompleteness of such information could adversely affect our business and financial performance.***

In deciding whether to extend credit or enter into other transactions with customers, for certain key elements of the credit assessment process, we rely on information furnished to us by or on behalf of customers (including in relation to their financial transactions and past credit history). We may also rely on certain representations from our customers as to the accuracy and completeness of that information. For ascertaining the creditworthiness and encumbrances on collateral we may depend on the respective registrars and sub-registrars of assurances, credit information companies or credit bureaus, and on independent valuers in relation to the value of the collateral, and our reliance on any misleading information given, may affect our judgement of credit worthiness of potential borrowers, and the value of and title to the collateral, which may affect our business, prospects, results of operations and financial condition. We may receive inaccurate or incomplete information as a result of negligence or fraudulent misrepresentation. Our risk management measures may not be adequate to prevent or deter such activities in all cases, which may adversely affect our business prospects, financial condition and results of operations.

4. ***We are evolving business and thus it makes difficult to evaluate our business and future operating results on the basis of our past performance, and our future results may exceed or may not meet our past performance.***

Our business is growing business and the results and amounts set forth in our financial statements may not provide a reliable indication of our future performance. Accordingly, you should evaluate our business and prospects in light of the risks, uncertainties and difficulties frequently encountered by both high growth companies and financial institutions that are in the early stages of development. Our failure to mitigate the risks and uncertainties associated with our business could materially adversely affect our business and operating results.

5. ***Our financial performance is particularly vulnerable to interest rate volatility. If we are unable to manage interest rate risk in the future it could have an adverse effect on our net interest margin, thereby adversely affecting business and financial condition of our company.***

Our results of operations are substantially dependent upon the level of our Net Interest Margins. Interest income from our financing activities is the largest component of our total income, and constituted 5.79%, 98.34%, 84.92%, and 99.82%, of our total income for the nine month period ending December 31, 2021, the Fiscal 2021, Fiscal 2020 and Fiscal 2019, respectively. To expand our business, we may borrow and lend funds on both fixed and floating rates. Volatility in interest rates can materially and adversely affect our financial performance. Though interest rates have been on declining trends in recent past, but with the recovery of economic activities, shrinking liquidity and rising inflation, interest rates may move upward. In a rising interest rate environment, if the yield on our interest-earning assets does not increase simultaneously with or to the same extent as our cost of funds, or, in a declining interest rate environment, if our cost of funds does not decline simultaneously or to the same extent as the yield on our interest-earning assets, our net interest income and net interest margin would be adversely impacted.

Accordingly, our operations are susceptible to fluctuations in interest rates. Interest rates are highly sensitive and fluctuations thereof are dependent upon many factors which are beyond our control, including the monetary policies of the RBI, de-regulation of the financial services sector in India, domestic and international economic and political conditions, inflation and other factors. Rise in inflation, and consequent changes in bank rates, repo rates and reverse repo rates by the RBI have led to an increase in interest rates on loans provided by banks and financial institutions, and market interest rates in India have been volatile in recent periods.

We cannot assure you that we can adequately manage our interest rate risk in the future. Further, changes in interest rates could affect the interest rates charged on interest earning assets and the interest rates paid on interest bearing liabilities in different ways. Thus, our results of operations could be affected by changes in interest rates and the timing of any re-pricing of our liabilities compared with the re-pricing

of our assets.

6. ***High levels of customer defaults or delays in repayment of loans could adversely affect our business, financial condition and results of operations.***

Our business involves lending money and accordingly we are subject to customer default risks including default or delay in repayment of principal and/or interest on our loans. Customers may default on their obligations to us as a result of various factors including bankruptcy, lack of liquidity, lack of business and operational failure. If borrowers fail to repay loans in a timely manner or at all, our financial condition and results of operations will be adversely impacted.

Although we believe that our risk management controls are sufficient, we cannot be certain that they will continue to be sufficient or that additional risk management policies for individual borrowers will not be required. Failure to continuously monitor the loan contracts, could adversely affect our credit portfolio which could have a material and adverse effect on our results of operations and financial condition.

7. ***Our indebtedness and the conditions and restrictions imposed by our financing agreements could restrict our ability to conduct our business and operations in the manner we desire.***

We may incur additional indebtedness in the future. Many of our financing agreements include various restrictive conditions and covenants restricting certain corporate actions, and our Company may be required to take the prior approval of the lender before carrying out such activities. Our indebtedness could have several important consequences, including our cash flows being used towards repayment of our existing debt, which will reduce the availability of our cash flow to fund our working capital, capital expenditures and other general corporate requirements. Moreover, our ability to obtain additional financing or renewal of existing facilities, in the future at reasonable terms may be restricted or our cost of borrowings may increase due to sudden adverse market conditions, including decreased availability of credit or fluctuations in interest rates. There could be a material adverse effect on our business, financial condition and results of operations if we are unable to service our indebtedness or otherwise comply with financial and other covenants specified in the financing agreements and we may be more vulnerable to economic downturns, which may limit our ability to withstand competitive pressures and may reduce our flexibility in responding to changing business, regulatory and economic conditions.

8. ***97.58% of our loan book comprises of unsecured loans. Our inability to recover the amounts due from customers in connection with such loans in a timely manner or at all and/or to comply with applicable statutory/regulatory requirements in connection with such loans could adversely affect our operations and profitability.***

Out of our Company's loan portfolio of ₹ 6,20,00,000 lakhs as at December 31, 2021, out of which 97.58% our loan book is unsecured loans. In relation to the unsecured loans, our ability to realise the amounts due to us for such loans would be restricted to initiating legal proceedings for recovery, as we will not have the benefit of enforcing any security interest related to such loans. There can be no guarantee as to the time that would be taken for the final disposal of such legal proceedings and/or our ability to obtain favourable decisions in connection therewith. Our inability to recover the amounts due from customers in connection with such loans in a timely manner or at all and/or to comply with applicable statutory/regulatory requirements in connection with such loans could adversely affect our operations and profitability.

9. ***We may not be able to recover, on a timely basis or at all, the full value of collateral or amounts which are sufficient to cover the outstanding amounts due under defaulted loans.***

Out of our Company's total loan portfolio of ₹ 620,00,000 as at December 31, 2021, 2.42% % of the aggregate gross value of our loan book is secured by collaterals.

The value of the security provided to us, may be subject to reduction in value on account of other extraneous reasons. Consequently, the realizable value of the security for the loans provided by us, when liquidated, may be lower than principal amount outstanding along with interest and other costs

recoverable from such customers.

Although we believe that we generally maintain a sufficient margin in the collateral value, if we have to enforce such pledges and if at the time of such enforcement, due to adverse market conditions, the market value of the pledged securities have fallen to a level where we are unable to recover the monies lent by us, along with interest accrued thereon and associated costs, the results of our operations would be adversely affected. In case of any shortfall in margins in connection with the securities pledged as collaterals, we typically call upon the relevant customer to provide further collateral to make up for the deficit in such margins. Furthermore, enforcing our legal rights by litigating against defaulting customers is generally a slow and potentially expensive process in India. Accordingly, it may be difficult for us to recover amounts owed by defaulting customers in a timely manner or at all.

10. ***Our Company's inability to obtain, renew or maintain the statutory and regulatory permits and approvals which are required to operate its existing or future businesses may have a material adverse effect on its business, financial condition, cash flows and results of operations.***

NBFCs in India are subject to regulations and supervision by the RBI. In addition to the numerous conditions required for the registration as an NBFC with the RBI, we are also required to comply with certain other regulatory requirements for its business imposed by the RBI. In the future, there could be circumstances where our Company may be required to renew applicable permits and approvals and obtain new permits and approvals for its current and any proposed operations or in the event of a change in applicable law and regulations. There can be no assurance that RBI or other relevant authorities will issue any such permits or approvals in the time-frame anticipated by our Company, or at all. In addition, we require several registrations to operate our branches in the ordinary course of business. These registrations include those required to be obtained or maintained under applicable legislations governing shops and establishments, professional tax, GST registrations etc. Some of these approvals may have expired in the ordinary course, and our Company has either applied, or is in the process of applying for renewals of them. Failure by our Company to renew, maintain or obtain the required permits or approvals may result in an interruption of its operations and may have a material adverse effect on its business, financial condition, cash flows and results of operation.

11. ***We face increasing competition in our business which may result in declining margins if we are unable to compete effectively.***

We face competition in all our lines of business. Our primary competitors are other NBFCs, public sector banks, private sector banks, co-operative banks and foreign banks and the unorganized financiers who principally operate in the markets where we operate. Banks have access to low cost funds which enables them to enjoy higher margins and / or offer finance at lower rates. NBFCs do not have access to large quantities of low cost deposits, a factor which can render them less competitive. In addition, interest rate deregulation and other liberalization measures affecting the retail and small and medium enterprises finance sector, together with increased demand for capital by individuals as well as small and medium enterprises, have resulted in an increase in competition.

We face competition from other NBFCs, microfinance companies as well as both commercial and small finance banks. In addition, our target customers also borrow from money lenders and non-institutional lenders which may lend at higher rates of interest. Our ability to compete effectively will depend, to some extent, on our ability to raise low-cost funding in the future. Furthermore, as a result of increased competition in the finance sector, finance products are becoming increasingly standardized and variable interest rate and payment terms and lower processing fees are becoming increasingly common in the finance sector in India. There can be no assurance that we will be able to react effectively to these or other market developments or compete effectively with new and existing players in the increasingly competitive finance industry. Increasing competition may have an adverse effect on our net interest margin, and, if we are unable to compete successfully, our market share may decline. If we are unable to compete effectively with other participants in the finance sector, our business, future financial performance may be adversely affected.

12. ***We are exposed to operational risks, including employee negligence, petty theft, burglary and embezzlement and fraud by employees, customers or third parties, which could harm our results of operations and financial position.***

We are exposed to the risk of theft, burglary and misappropriation or unauthorized transactions by our employees and fraud by employees, customers or third parties. Our insurance policies, security systems and measures undertaken to detect and prevent these risks may not be sufficient to prevent or deter such activities in all cases, which may adversely affect our operations and profitability. Further, we may be subject to regulatory or other proceedings in connection with any unauthorized transaction, fraud or misappropriation by our representatives and employees, which could adversely affect our goodwill.

13. ***We may experience difficulties in expanding our products.***

Expanding our products portfolio with new or existing products can be costly and require significant management time and attention. Additionally, as our operations grow in size, scope and complexity and our product offerings increase, we will need to enhance and upgrade our systems and infrastructure to offer an increasing number of enhanced solutions, features and functionality. The expansion of our systems and infrastructure will require us to commit substantial financial, operational and technical resources in advance of an increase in the volume of business, with no assurance that the volume of business will increase. We will need to recruit new employees, who will have to be trained and integrated into our operations. We will also have to train existing employees to adhere properly to internal controls and risk management procedures. Failure to train our employees properly may result in an increase in employee attrition rates, require additional hiring, erode the quality of customer service, divert management resources, increase our exposure to high -risk credit and impose significant costs on us.

14. ***We may experience difficulties in expanding our business into new regions and markets in India***

Historically, our distribution networks is concentrated in New Delhi. As part of our growth strategy, we strive to evaluate attractive growth opportunities to expand our business into new regions and markets in India. Factors such as competition, culture, regulatory regimes, business practices & customs and customer requirements in these new markets may differ from those in our current markets and our experience in our current markets may not be applicable to these new markets. In addition, as we enter new markets and geographical regions, we are likely to compete with other banks and financial institutions that already have a presence in those geographies and markets and are therefore more familiar with local regulations, business practices and customs and have stronger relationships with customers. Our business may be exposed to various additional challenges including obtaining necessary governmental approvals, successfully gauging market conditions in local markets with which we have no previous familiarity; attracting potential customers in a market in which we do not have significant experience or visibility; being susceptible to local taxation in additional geographical areas of India and adapting our marketing strategy and operations to different regions of India in which different languages are spoken. Our inability to expand our current operations may adversely affect our business prospects, financial conditions and results of operations.

15. ***Our business is based on the trust and confidence of our customers; any damage to that trust and confidence may materially and adversely affect our business, future financial performance and results of operations.***

We are dedicated to earning and maintaining the trust and confidence of our customers and we believe that the good reputation is essential to our business. The reputation of our Company could be adversely affected by any threatened and/or legal proceedings and/or any negative publicity or news articles in connection with our Company. As such, any damage to our reputation could substantially impair our ability to maintain or grow our business. If we fail to maintain brand recognition with our target customers due to any issues with our product offerings, a deterioration in service quality, or otherwise, declines the our market perception and customer acceptance of our brands may also decline.

16. ***System failures or inadequacy and security breaches in computer systems may adversely affect our business.***

Our financial, accounting or other data processing systems may fail to operate adequately or become disabled as a result of events that are wholly or partially beyond our control including a disruption of electrical or communications services. Our ability to operate and remain competitive will depend in part on our ability to maintain and upgrade our information technology systems on a timely and cost-effective basis. Our operations also rely on the secure processing, storage and transmission of confidential and other information in our computer systems and networks. Our computer systems, software and networks may be vulnerable to unauthorized access, computer viruses or other malicious code and other events that could compromise data integrity and security. Any failure to effectively maintain or improve or upgrade our management information systems in a timely manner could materially and adversely affect our competitiveness, financial position and results of operations. Moreover, if any of these systems do not operate properly or are disabled or if there are other shortcomings or failures in our internal processes or systems, it could affect our operations or result in financial loss, disruption of our businesses, regulatory intervention or damage to our reputation. In addition, our ability to conduct business may be adversely impacted by a disruption in the infrastructure that supports our businesses and the localities in which we are located.

17. ***Our measures to prevent money laundering may not be completely effective and we may be subject to scrutiny and penalties by the RBI for failure to implement effective measures.***

Our Company is required to comply with applicable anti-money-laundering and anti-terrorism laws and other regulations in India. Our measures to prevent money laundering as required by the RBI and other KYC compliance applicable in India, including the Reserve Bank of India (Know Your Customer) Master Directions, 2016 dated February 25, 2016, as amended ("KYC Directions") and the adoption of anti-money laundering policies and compliance procedures may not be completely effective. In the event, if any regulatory authorities believes that we are not complying with required money laundering compliances and/or KYC Compliances, there may be civil and criminal penalties for non-compliance and our business and results of operations could be adversely affected.

18. ***Our trademarks used by us are currently not registered in the name of our Company. Failure to protect our intellectual property rights may adversely affect our competitive business position, financial condition and profitability.***

Our trademark are not registered under the provisions of Trademark Act, 1999 and therefore may be subject to counterfeiting or imitation which would adversely impact our reputation and lead to loss of customer confidence, reduced sales and higher administrative costs. Thus, we cannot guarantee that the application for registration of some of our trademarks made by us will be allowed. In case we are unable to obtain the registration for the said trademarks in our name, we may suffer reputation loss, loss of customers etc. as we do not enjoy any statutory protection under the Trade Marks Act, 1999 for the aforesaid trademark which is important to retain our brand image. Further even if our trademarks are registered, we cannot assure that third parties will not infringe on our intellectual property, thereby causing damage to our business prospects, reputation and goodwill.

19. ***Our success depends in large part upon key personnel and our ability to attract, train and retain such persons.***

Our ability to sustain our rate of growth depends significantly upon our ability to manage key issues such as selecting and retaining key operations personnel, developing managerial experience to address emerging challenges and ensuring a high standard of client service. In order to be successful, we must attract, train, motivate and retain highly skilled employees. Failure to train and motivate our employees properly may result in an increase in employee attrition rates, divert management resources and subject us to incurring additional human resource related expenditure.

20. ***Our Promoters and Directors may have interests in our Company other than reimbursement of expenses incurred or remuneration or benefits.***

Our Promoters and Directors may be deemed to be interested in our Company, in addition to the regular remuneration or benefits, reimbursements of expenses, Equity Shares held by them or their relatives, their dividend or bonus entitlement, benefits arising from their directorship in our Company. Our Promoters and Directors may also be interested to the extent of any transaction entered into by our Company with any other company or firm in which they are directors or partners.

There can be no assurance that our Promoters, and Directors will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters and members of our Promoter Group will continue to exercise significant control over our Company, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting.

21. ***Our Promoters and members of the Promoter Group have significant control over the Company and have the ability to direct our business and affairs; their interests may conflict with your interests as a shareholder.***

Our Promoters and members of the Promoter Group have significant control over the Company and have the ability to direct our business and affairs. So long as the Promoters have a majority holding, they will be able to elect the entire Board and control most matters affecting us, including the appointment and removal of the officers of our Company, our business strategy and policies and financing. Further, the extent of the Promoters' shareholding in our Company may result in the delay or prevention of a change of management or control of our Company, even if such a transaction may be beneficial to the other shareholders of our Company.

22. ***Our registered office is a leased premise and non-renewal of lease agreement or its renewal on terms unfavourable to us could adversely affect our operations.***

Our Registered Office is in leased premise. If the owner of the premise do not renew the agreements under which we occupy the premise, or if they seek to renew such agreements on terms and conditions unfavourable to us, or if they terminate the agreement we may suffer a disruption in our operations or increased costs, or both, which may adversely affect our business and results of operations.

23. ***We have in the past entered into related party transactions and may continue to do so in the future, which may potentially involve conflicts of interest with the equity shareholders.***

We have entered into various transactions with related parties. While we believe that all such transactions have been conducted on an arm's length basis and contain commercially reasonable terms, we cannot assure you that we could not have achieved more favourable terms had such transactions been entered into with unrelated parties.

24. ***The new bankruptcy code in India may affect our rights to recover loans from borrowers.***

The Insolvency and Bankruptcy Code, 2016 ("**Bankruptcy Code**") was notified on August 5, 2016. The Bankruptcy Code offers a uniform and comprehensive insolvency legislation encompassing all companies, partnerships and individuals (other than financial firms). It allows creditors to assess the viability of a debtor as a business decision, and agree upon a plan for its revival or a speedy liquidation. The Bankruptcy Code creates a new institutional framework, consisting of a regulator, insolvency professionals, information utilities and adjudicatory mechanisms, which will facilitate a formal and time-bound insolvency resolution and liquidation process.

In case insolvency proceedings are initiated against a debtor to our Company, we may not have complete control over the recovery of amounts due to us. Under the Bankruptcy Code, upon invocation of an insolvency resolution process, a committee of creditors is constituted by the interim resolution professional, wherein each financial creditor is given a voting share proportionate to the debts owed to it. Bankruptcy Code provides a 180-day timeline which may be extended by 90 days when dealing with

insolvency resolution applications. Subsequently, the insolvency resolution plan prepared by the insolvency professionals has to be approved by 66% of voting share of financial creditors, which requires sanction by the adjudicating authority and, if rejected, the adjudicating authority will pass an order for liquidation. Any resolution plan approved by committee of creditors is binding upon all creditors, even if they vote against it. In case a liquidation process is opted for, the Bankruptcy Code provides for a fixed order of priority in which proceeds from the sale of the debtor's assets are to be distributed. Before sale proceeds are distributed to a secured creditor, they are to be distributed for the costs of the insolvency resolution and liquidation processes, debts owed to workmen and other employees. Further, under this process, dues owed to the Central and State Governments rank at par with those owed to secured creditors. Moreover, other secured creditors may decide to opt out of the process, in which case they are permitted to realise their security interests in priority.

Accordingly, if the provisions of the Bankruptcy Code are invoked against any of the borrowers of our Company, it may affect our Company's ability to recover our loans from the borrowers and enforcement of our Company's rights will be subject to the Bankruptcy Code.

Further, the GoI vide notification dated March 24, 2020 ("**Notification**") has amended section 4 of the Bankruptcy Code due the lingering impact of the COVID-19 pandemic. Pursuant to the said Notification, GoI has increased the minimum amount of default under the insolvency matters from ₹1,00,000 to ₹1,00,00,000. Therefore the ability of our Company to initiate insolvency proceedings against the defaulters where the amount of default in an insolvency matter is less the ₹1,00,00,000 may impact the recovery of outstanding loans and profitability of our Company.

25. ***The fund requirement and deployment mentioned in the Objects of the Issue have not been appraised by any bank or financial institution.***

The fund requirement and deployment is based on internal management estimates and has not been appraised by any bank or financial institution. The management will have significant flexibility in applying the proceeds received by us from the Issue.

26. ***The deployment of funds is entirely at our discretion and as per the details mentioned in the chapter titled "Objects of the Issue".***

As the Issue size is not more than ₹10,000 lakhs, under Regulation 82 of the SEBI ICDR Regulations it is not required that a monitoring agency be appointed by our Company, for overseeing the deployment and utilisation of funds raised through this Issue. Therefore, the deployment of the funds towards the Objects of this Issue is entirely at the discretion of our Board of Directors and is not subject to monitoring by external independent agency. Our Board of Directors along with the Audit Committee will monitor the utilisation of Issue proceeds and shall have the flexibility in applying the proceeds of this Issue. However, the management of our Company shall not have the power to alter the objects of this Issue except with the approval of the Shareholders of the Company given by way of a special resolution in a general meeting, in the manner specified in Section 27 of the Companies Act, 2013. Additionally, the dissenting shareholders being those shareholders who have not agreed to the proposal to vary the objects of this Issue, our Promoters shall provide them with an opportunity to exit at such price, and in such manner and conditions as may be specified by the SEBI, in respect to the same.

27. ***As the Equity Shares of our Company are listed on BSE, our Company is subject to certain obligations and reporting requirements under SEBI Listing Regulations. Any non-compliances/delay in complying with such obligations and reporting requirements may render us/our promoter liable to prosecution and/or penalties.***

Our Company is subject to the obligations and reporting requirements under SEBI Listing Regulations. In the past, our Company had not complied with certain provisions of the SEBI Listing Regulations. Though our Company endeavours to comply with all such obligations/reporting requirements, there have been certain instances of non-compliance and delays in complying with such obligations/reporting requirements. Any such delays or non-compliance would render our Company to prosecution and/or penalties. Although our Company have not received any further communication from the Stock Exchange or any authority in this regard, there could be a possibility that penalties may be levied against

our Company for certain instances of non-compliance and delays in complying with such obligations/reporting requirements.

28. ***In the past, there have been instances of delayed or erroneous filing of certain forms which were required to be filed as per the reporting requirements under the Companies Act, 1956 and Companies Act, 2013 to RoC by our Company and our Subsidiary.***

In the past, there have been certain instances of delay in filing of statutory forms as per the reporting requirements under the Companies Act, 1956 and Companies Act, 2013 with the RoC, which have been subsequently filed by payment of an additional fee as specified by RoC by our Company and our Subsidiary.

No show cause notice in respect to the above has been received by our Company or our Subsidiary till date and except as stated in this Draft Letter of Offer, no penalty or fine has been imposed by any regulatory authority in respect to the same. The occurrence of instances of delayed or erroneous filings in future may impact our results of operations and financial position.

29. ***Our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.***

Our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements. We may be unable to pay dividends in the near or medium term, and our future dividend policy will depend on our capital requirements and financing arrangements in respect of our operations, financial condition and results of operations.

ISSUE SPECIFIC RISK

31. ***Our Company will not distribute the Letter of Offer and Application Form to certain overseas Shareholders who have not provided an address in India for service of documents.***

Our Company will dispatch this Letter of Offer, the Abridged Letter of Offer, Rights Entitlement Letter and Application Form (the "**Offering Materials**") to such Shareholders who have provided an address in India for the service of documents. The Offering Materials will not be distributed to addresses outside India on account of restrictions that apply to the circulation of such materials in various overseas jurisdictions. However, the Companies Act requires companies to serve documents at any address, which may be provided by the members as well as through e-mail. Presently, there is a lack of clarity under the Companies Act, 2013, and the rules thereunder, with respect to the distribution of Offering Materials to retail individual shareholders in overseas jurisdictions where such distribution may be prohibited under applicable laws of such jurisdictions.

32. ***SEBI has recently, by way of circulars dated January 22, 2020, May 6, 2020, July 24, 2020, January 19, 2021 and April 22, 2021, streamlined the process of rights issues. You should follow the instructions carefully, as stated in such SEBI circulars and in this Draft Letter of Offer.***

The concept of crediting Rights Entitlements into the demat accounts of the Eligible Equity Shareholders has recently been introduced by the SEBI. Accordingly, the process for such Rights Entitlements has been recently devised by capital market intermediaries. Eligible Equity Shareholders are encouraged to exercise caution, carefully follow the requirements as stated in the SEBI circulars dated January 22, 2020, May 6, 2020, July 24, 2020, January 19, 2021 and April 22, 2021, and ensure completion of all necessary steps in relation to providing/updating their demat account details in a timely manner. For details, see "Terms of the Issue" on page 113.

In accordance with Regulation 77A of the SEBI ICDR Regulations read with the SEBI Rights Issue Circular, the credit of Rights Entitlements and Allotment of Rights Equity Shares shall be made in dematerialized form only. Prior to the Issue Opening Date, our Company shall credit the Rights Entitlements to (i) the demat accounts of the Eligible Equity Shareholders holding the Equity Shares in dematerialised form; and (ii) a demat suspense escrow account (namely, "[●]") opened by our Company, for the Eligible Equity Shareholders which would comprise Rights Entitlements relating to (a) Equity Shares held in a demat suspense account pursuant to Regulation 39 of the SEBI Listing Regulations; or (b) Equity Shares held in the account of IEPF authority; or (c) the demat accounts of the Eligible Equity Shareholder which are frozen or details of which are unavailable with our Company or with the Registrar on the Record Date; or (d) credit of the Rights Entitlements returned/reversed/failed; or (e) the ownership of the Equity Shares currently under dispute, including any court proceedings.

33. ***The R-WAP payment mechanism facility proposed to be used for this Issue may be exposed to risks, including risks associated with payment gateways.***

In accordance with SEBI circulars dated May 6, 2020, July 24, 2020, January 19, 2021 and April 22, 2021, a separate web based application platform, i.e., the R-WAP facility has been instituted for making an Application in this Issue by resident Investors. Further, R-WAP is only an additional option and not a replacement of the ASBA process. On R-WAP, the Eligible Shareholder scan access and fill the Application Form in electronic mode and make online payment using the internet banking or UPI facility from their own bank account there at. For details, see "Terms of the Issue" on page 113. Such payment gateways and mechanisms are faced with risks such as:

- keeping information technology systems aligned and up to date with the rapidly evolving technology in the payment services industries;
- scaling up technology infrastructure to meet requirements of growing volumes;
- applying risk management policies effectively to such payment mechanisms;
- keeping users' data safe and free from security breaches; and
- effectively managing payment solutions logistics and technology infrastructure.

Further, R-WAP is a new facility which has been instituted due to challenges arising out of COVID-19 pandemic. We cannot assure you that R-WAP facility will not suffer from any unanticipated system failure or breakdown or delay, including failure on part of the payment gateway, and therefore, your Application may not be completed or rejected. These risks are indicative and any failure to manage them effectively can impair the efficacy and functioning of the payment mechanism for this Issue. Since Application process through R-WAP is different from the ASBA process, there can be no assurance that investors will not find difficulties in accessing and using the R-WAP facility.

34. ***Failure to exercise or sell the Rights Entitlements will cause the Rights Entitlements to lapse without compensation and result in a dilution of shareholding.***

Rights Entitlements that are not exercised prior to the end of the Issue Closing Date will expire and become null and void, and Eligible Equity Shareholders will not receive any consideration for them. The proportionate ownership and voting interest in our Company of Eligible Equity Shareholders who fail (or are not able) to exercise their Rights Entitlements will be diluted. Even if you elect to sell your unexercised Rights Entitlements, the consideration you receive for them may not be sufficient to fully

compensate you for the dilution of your percentage ownership of the equity share capital of our Company that may be caused as a result of the Issue. Renounees may not be able to apply in case of failure in completion of renunciation through off-market transfer in such a manner that the Rights Entitlements are credited to the demat account of the Renounees prior to the Issue Closing Date. Further, in case, the Rights Entitlements do not get credited in time, in case of On Market Renunciation, such Renounee will not be able to apply in this Issue with respect to such Rights Entitlements. For details, see "Terms of the Issue" on page 113.

35. ***The entitlement of Equity Shares to be allotted to investors applying for Allotment in physical form, will be kept in abeyance.***

In accordance with the SEBI ICDR Regulations, the option to receive the Rights Equity Shares in physical form will not be available after a period of six months from the date of coming into force of the SEBI ICDR Regulations, i.e., May 10, 2019. Since, the Rights Equity Shares offered pursuant to this Issue will be Allotted only after May 10, 2019, the entitlement of Rights Equity Shares to be Allotted to the Applicants who have applied for Allotment of the Rights Equity Shares in physical form will be kept in abeyance in electronic mode by our Company until the Applicants provide details of their demat account particulars to the Registrar. Pursuant to a press release dated December 3, 2018 issued by the SEBI, with effect from April 1, 2019, a transfer of listed Equity Shares cannot be processed unless the Equity Shares are held in dematerialized form (except in case of transmission or transposition of Equity Shares).

36. ***The Rights Entitlement of Eligible Equity Shareholders holding Equity Shares in physical form ("Physical Shareholder") may lapse in case they fail to furnish the details of their demat account to the Registrar.***

The concept of crediting Rights Entitlements into the demat accounts of the Eligible Equity Shareholders has recently been introduced by the SEBI. Accordingly, the process for such Rights Entitlements has been recently devised by capital market intermediaries. Eligible Equity Shareholders are encouraged to exercise caution, carefully follow the requirements as stated in the SEBI circulars dated January 22, 2020 and May 6, 2020, read with SEBI circular SEBI/HO/CFD/DIL1/CIR/P/2020/136 dated July 24, 2020, SEBI circular SEBI/HO/CFD/DIL1/CIR/P/2021/13 dated January 19, 2021, SEBI circular bearing reference number SEBI/HO/CFD/DIL2/CIR/P/2021/552 dated April 22, 2021 and SEBI circular bearing reference number SEBI/HO/CFD/DIL2/CIR/P/2021/633 dated October 01, 2021, and ensure completion of all necessary steps in relation to providing/updating their demat account details in a timely manner. For details, see "Terms of the Issue" on page 113. In accordance with Regulation 77A of the SEBI ICDR Regulations read with the SEBI Rights Issue Circulars, the credit of Rights Entitlements and Allotment of Rights Equity Shares shall be made in dematerialized form only.

37. ***Failure to exercise or sell the Rights Entitlements will cause the Rights Entitlements to lapse without compensation and result in a dilution of shareholding.***

Rights Entitlements that are not exercised prior to the end of the Issue Closing Date will expire and become null and void, and Eligible Equity Shareholders will not receive any consideration for them. The proportionate ownership and voting interest in our Company of Eligible Equity Shareholders who fail (or are not able) to exercise their Rights Entitlements will be diluted. Even if you elect to sell your unexercised Rights Entitlements, the consideration you receive for them may not be sufficient to fully compensate you for the dilution of your percentage ownership of the equity share capital of our Company that may be caused as a result of the Issue. Renounees may not be able to apply in case of failure in completion of renunciation through off-market transfer in such a manner that the Rights Entitlements are credited to the demat account of the Renounees prior to the Issue Closing Date. Further, in case, the Rights Entitlements do not get credited in time, in case of On Market Renunciation, such Renounee will not be able to apply in this Issue with respect to such Rights Entitlements. For details, see "Terms of the Issue" on page 113.

38. ***Any future issuance of Equity Shares, or convertible securities or other equity-linked securities by our Company may dilute your shareholding and any sale of Equity Shares by our Promoter or members of our Promoter Group may adversely affect the trading price of the Equity Shares.***

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by our Company may dilute your shareholding in our Company; adversely affect the trading price of the Equity Shares and our ability to raise capital through an issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our Promoter and Promoter Group, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that our Promoter and Promoter Group will not dispose of, pledge or encumber their Equity Shares in the future.

39. ***You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.***

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares of an Indian company are generally taxable in India. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short-term capital gains tax in India. Capital gains arising from the sale of the Equity Shares may be partially or completely exempt from taxation in India in cases where such exemption is provided under a treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on gains made upon the sale of the Equity Shares.

40. ***You may not receive the Equity Shares that you subscribe in the Issue until fifteen days after the date on which this Issue closes, which will subject you to market risk.***

The Equity Shares that you subscribe in the Issue may not be credited to your demat account with the depository participants until approximately 15 days from the Issue Closing Date. You can start trading such Equity Shares only after receipt of the listing and trading approval in respect thereof. There can be no assurance that the Equity Shares allocated to you will be credited to your demat account, or that trading in the Equity Shares will commence within the specified time period, subjecting you to market risk for such period.

41. ***There is no guarantee that our Equity Shares will be listed in a timely manner or at all which may adversely affect the trading price of our Equity Shares.***

In accordance with Indian law and practice, final approval for listing and trading of the Equity Shares will not be granted by the Stock Exchanges until after those Equity Shares have been issued and allotted. Approval will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on Stock Exchanges. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares. Further, historical trading prices, therefore, may not be indicative of the prices at which the Equity Shares will trade in the future which may adversely impact the ability of our shareholders to sell the Equity Shares or the price at which shareholders may be able to sell their Equity Shares at that point of time.

42. ***Holders of Equity Shares could be restricted in their ability to exercise pre-emptive rights under Indian law and could thereby suffer future dilution of their ownership position.***

Under the Companies Act, any company incorporated in India must offer its holders of equity shares pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages prior to the issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the shares voted on such resolution, unless our Company has obtained government approval to issue without such rights.

However, if the law of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without us filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights unless we make such a filing. We may elect not to file a registration statement in relation to pre-emptive rights otherwise available by Indian law to you. To the extent that you are unable to exercise pre-emptive rights granted in respect of the Equity Shares, your proportional interests in us would be reduced.

43. ***Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may adversely affect the value of our Equity Shares, independent of our operating results.***

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchanges. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time that it takes to undertake such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating outside India the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by equity shareholders. For example, the exchange rate between the Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may adversely affect the trading price of our Equity Shares and returns on our Equity Shares, independent of our operating results.

44. ***Sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.***

Any instance of disinvestments of equity shares by our Promoter or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

45. ***Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.***

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

External Risk Factor

46. ***Significant differences exist between Ind AS, Indian GAAP and other accounting principles, such as US GAAP and International Financial Reporting Standards ("IFRS"), which investors may be more familiar with and consider material to their assessment of our financial condition.***

Summary statements of assets and liabilities as at March 31, 2021 and summary statements of profit and loss (including other comprehensive income), cash flows and changes in equity for the Fiscals 2021 have been prepared in accordance with the Indian Accounting Standards notified under Section 133 of the Companies Act, 2013, read with the Ind AS Rules and, the SEBI Circular and the Prospectus Guidance Note.

We have not attempted to quantify the impact of US GAAP, IFRS or any other system of accounting principles on the financial data included in this Draft Letter of Offer, nor do we provide a reconciliation of our financial statements to those of US GAAP, IFRS or any other accounting principles. US GAAP and IFRS differ in significant respects from Ind AS and Indian GAAP. Accordingly, the degree to which the Financial Information included in this Draft Letter of Offer will provide meaningful information is entirely dependent on the reader's level of familiarity with Ind AS, Indian GAAP and the SEBI ICDR

Regulations. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Draft Letter of Offer should accordingly be limited.

47. ***Political, economic or other factors that are beyond our control may have adversely affect our business and results of operations.***

The Indian economy is influenced by economic developments in other countries. These factors could depress economic activity which could have an adverse effect on our business, financial condition and results of operations. Any financial disruption could have an adverse effect on our business and future financial performance.

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our services may be adversely affected by an economic downturn in domestic, regional and global economies.

Economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports, global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production.

Consequently, any future slowdown in the Indian economy could harm our business, results of operations and financial condition. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

48. ***A slowdown in economic growth in India could cause our business to suffer.***

We are incorporated in India, and all of our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. A slowdown in the Indian economy could adversely affect our business, including our ability to grow our assets, the quality of our assets, and our ability to implement our strategy.

Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- any increase in Indian interest rates or inflation;
- any scarcity of credit or other financing in India;
- prevailing income conditions among Indian consumers and Indian corporations;
- changes in India's tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighboring countries;
- prevailing regional or global economic conditions; and
- other significant regulatory or economic developments in or affecting India

Any slowdown in the Indian economy or in the growth of the sectors we participate in or future volatility in global commodity prices could adversely affect our borrowers and contractual counterparties. This in turn could adversely affect our business and financial performance and the price of our Equity Shares.

49. ***Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, prospects and results of operations.***

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any

such changes in applicable law and policy.

The Government of India has issued a notification dated September 29, 2016 notifying Income Computation and Disclosure Standards ("ICDS"), thereby creating a new framework for the computation of taxable income. The ICDS became applicable from the assessment year for Fiscal 2018 and subsequent years. The adoption of ICDS is expected to significantly alter the way companies compute their taxable income, as ICDS deviates from several concepts that are followed under general accounting standards, including Indian GAAP and Ind AS. In addition, ICDS shall be applicable for the computation of income for tax purposes but shall not be applicable for the computation of income for minimum alternate tax. There can be no assurance that the adoption of ICDS will not adversely affect our business, results of operations and financial condition.

- the General Anti Avoidance Rules ("**GAAR**") have been made effective from April 1, 2017. The tax consequences of the GAAR provisions being applied to an arrangement could result in denial of tax benefit amongst other consequences. In the absence of any precedents on the subject, the application of these provisions is uncertain. If the GAAR provisions are made applicable to our Company, it may have an adverse tax impact on us.
- a comprehensive national GST regime that combines taxes and levies by the Central and State Governments into a unified rate structure, which came into effect from July 1, 2017. We cannot provide any assurance as to any aspect of the tax regime following implementation of the GST. Any future increases or amendments may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable. If, as a result of a particular tax risk materializing, the tax costs associated with certain transactions are greater than anticipated, it could affect the profitability of such transactions.

In addition, unfavorable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations including foreign investment laws governing our business, operations and group structure could result in us being deemed to be in contravention of such laws or may require us to apply for additional approvals. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may affect the viability of our current business or restrict our ability to grow our business in the future.

Any increase in taxes and levies, or the imposition of new taxes and levies in the future, could increase the cost of production and operating expenses. Taxes and other levies imposed by the central or state governments in India that affect our industry include customs duties, excise duties, sales tax, income tax and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. The central and state tax scheme in India is extensive and subject to change from time to time. Any adverse changes in any of the taxes levied by the central or state governments may adversely affect our competitive position and profitability.

50. ***Financial instability in both Indian and international financial markets could adversely affect our results of operations and financial condition.***

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the United States and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have an adverse effect on the securities of companies in other countries. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in the Indian economy in general. Any global financial instability, including further deterioration of credit conditions in the U.S. market, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our results of operations and financial condition.

The Indian economy is also influenced by economic and market conditions in other countries. This includes, but is not limited to, the conditions in the United States, Europe and certain economies in Asia. Financial turmoil in Asia and elsewhere in the world in recent years has affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and its business.

Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby impact the Indian economy. Financial disruptions in the future could adversely affect our business, prospects, financial condition and results of operations. The global credit and equity markets have experienced substantial dislocations, liquidity disruptions and market corrections.

There are concerns that a tightening of monetary policy in emerging markets and some developed markets will lead to a moderation in global growth. In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, have implemented a number of policy measures designed to add stability to the financial markets. However, the overall long-term impact of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have had the intended stabilizing effects. Any significant financial disruption in the future could have an adverse effect on our cost of funding, loan portfolio, business, future financial performance and the trading price of the Equity Shares.

51. ***Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.***

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of salaries, and other expenses relevant to our business.

High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether entirely or in part, and the same may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase our rates to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected.

Further, the GOI has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

52. ***Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.***

As an Indian Company, we are subject to exchange controls that regulate borrowing in foreign currencies, including those specified under FEMA. Such regulatory restrictions limit our financing sources and hence could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that the required approvals will be granted to us without onerous conditions, or at all. Limitations on foreign debt may adversely affect our business growth, results of operations and financial condition.

Further, under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required.

Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

53. ***Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.***

Any adverse revisions to India's credit ratings international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

54. ***The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.***

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business.

Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

55. ***We are subject to regulatory, economic, social and political uncertainties and other factors beyond our control.***

We are incorporated in India and we conduct our corporate affairs and our business in India. Consequently, our business, operations, financial performance will be affected by interest rates, government policies, taxation, social and ethnic instability and other political and economic developments affecting India.

Factors that may adversely affect the Indian economy, and hence our results of operations may include:

- any exchange rate fluctuations, the imposition of currency controls and restrictions on the right to convert or repatriate currency or export assets;
- any scarcity of credit or other financing in India, resulting in an adverse effect on economic conditions in India and scarcity of financing for our expansions;
- prevailing income conditions among Indian customers and Indian corporations;
- epidemic or any other public health in India or in countries in the region or globally, including in India's various neighboring countries;
- hostile or war like situations with the neighboring countries;
- macroeconomic factors and central bank regulation, including in relation to interest rates movements which may in turn adversely impact our access to capital and increase our borrowing costs;
- decline in India's foreign exchange reserves which may affect liquidity in the Indian economy;
- downgrading of India's sovereign debt rating by rating agencies; and
- difficulty in developing any necessary partnerships with local businesses on commercially acceptable terms and/or a timely basis.
- Any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy or certain regions in India, could adversely affect our business, results of

operations and financial condition and the price of the Equity Shares.

56. ***Financial instability in other countries may cause increased volatility in Indian financial markets.***

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, particularly emerging market countries in Asia. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss of investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business, our future financial performance and the prices of the Equity Shares.

The recent outbreak of Novel Coronavirus has significantly affected financial markets around the world. Any other global economic developments or the perception that any of them could occur may continue to have an adverse effect on global economic conditions and the stability of global financial markets, and may significantly reduce global market liquidity and restrict the ability of key market participants to operate in certain financial markets. Any of these factors could depress economic activity and restrict our access to capital, which could have an adverse effect on our business, financial condition and results of operations and reduce the price of our Equity Shares. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders' equity and the price of our Equity Shares.

GOLBAL ECONOMY AT LARGE

Economic prospects have diverged further across countries since the April 2021 World Economic Outlook ("WEO") forecast. Vaccine access has emerged as the principal fault line along which the global recovery splits into two blocs: those that can look forward to further normalization of activity later this year (almost all advanced economies) and those that will still face resurgent infections and rising COVID death tolls. The recovery, however, is not assured even in countries where infections are currently very low so long as the virus circulates elsewhere.

The global economy is projected to grow 6.0 percent in 2021 and 4.9 percent in 2022. The 2021 global forecast is unchanged from the April 2021 WEO, but with offsetting revisions. Prospects for emerging market and developing economies have been marked down for 2021, especially for Emerging Asia. By contrast, the forecast for advanced economies is revised up. These revisions reflect pandemic developments and changes in policy support. The 0.5 percentage-point upgrade for 2022 derives largely from the forecast upgrade for advanced economies, particularly the United States, reflecting the anticipated legislation of additional fiscal support in the second half of 2021 and improved health metrics more broadly across the group.

Recent price pressures for the most part reflect unusual pandemic-related developments and transitory supply-demand mismatches. Inflation is expected to return to its pre-pandemic ranges in most countries in 2022 once these disturbances work their way through prices, though uncertainty remains high. Elevated inflation is also expected in some emerging market and developing economies, related in part to high food prices. Central banks should generally look through transitory inflation pressures and avoid tightening until there is more clarity on underlying price dynamics. Clear communication from central banks on the outlook for monetary policy will be key to shaping inflation expectations and safeguarding against premature tightening of financial conditions. There is, however, a risk that transitory pressures could become more persistent and central banks may need to take preemptive action.

Risks around the global baseline are to the downside. Slower-than-anticipated vaccine rollout would allow the virus to mutate further. Financial conditions could tighten rapidly, for instance from a reassessment of the monetary policy outlook in advanced economies if inflation expectations increase more rapidly than anticipated. A double hit to emerging market and developing economies from worsening pandemic dynamics and tighter external financial conditions would severely set back their recovery and drag global growth below this outlook's baseline.

Multilateral action has a vital role to play in diminishing divergences and strengthening global prospects. The immediate priority is to deploy vaccines equitably worldwide. A \$50 billion IMF staff proposal, jointly endorsed by the World Health Organization, World Trade Organization, and World Bank, provides clear targets and pragmatic actions at a feasible cost to end the pandemic. Financially constrained economies also need unimpeded access to international liquidity. The proposed \$650 billion General Allocation of Special Drawing Rights at the IMF is set to boost reserve assets of all economies and help ease liquidity constraints. Countries also need to

redouble collective efforts to reduce greenhouse gas emissions. These multilateral actions can be reinforced by national-level policies tailored to the stage of the crisis that help catalyze a sustainable, inclusive recovery. Concerted, well-directed policies can make the difference between a future of durable recoveries for all economies or one with widening fault lines as many struggle with the health crisis while a handful see conditions normalize, albeit with the constant threat of renewed flare-ups.

Financially constrained economies also need unimpeded access to international liquidity. Countries also need to redouble collective efforts to reduce greenhouse gas emissions. These multilateral actions can be reinforced by national-level policies tailored to the stage of the crisis that help catalyze a sustainable, inclusive recovery.

Concerted, well-directed policies can make the difference between a future of durable recoveries for all economies or one with widening fault lines as many struggle with the health crisis while a handful see conditions normalize, albeit with the constant threat of renewed flare-ups. Amid exceptional uncertainty, the global economy is projected to grow 5.5 percent in 2021 and 4.2 percent in 2022. Strong multilateral cooperation is required to bring the pandemic under control everywhere. Such efforts include bolstering funding for the COVAX facility to accelerate access to vaccines for all countries, ensuring universal distribution of vaccines, and facilitating access to therapeutics at affordable prices for all. Many countries, particularly low-income developing economies, entered the crisis with high debt that is set to rise further during the pandemic.

The global community will need to continue working closely to ensure adequate access to international liquidity for these countries. Where sovereign debt is unsustainable, eligible countries should work with creditors to restructure their debt under the Common Framework agreed by the G20. A stronger starting point for the 2021-22 forecast. Multiple vaccine approvals and the launch of vaccination in some countries in December have raised hopes of an eventual end to the pandemic. Moreover, economic data released after the October 2020 WEO forecast suggest stronger-than-projected momentum on average across regions in the second half of 2020.

Despite the high and rising human toll of the pandemic, economic activity appears to be adapting to subdued contact-intensive activity with the passage of time. Finally, additional policy measures announced at the end of 2020 notably in the United States and Japan are expected to provide further support in 2021-22 to the global economy. These developments indicate a stronger starting point for the 2021-22 global outlook than envisaged in the previous forecast. Lingering concerns.

However, surging infections in late 2020 (including from new variants of the virus), renewed lockdowns, logistical problems with vaccine distribution, and uncertainty about take-up are important counterpoints to the favorable news. Much remains to be done on the health and economic policy fronts to limit persistent damage from these were contraction of 2020 and ensure a sustained recovery. These developments raise three interrelated questions for the global outlook. First, how will restrictions needed to curb transmission affect activity in the near term before vaccines begin delivering effective society-wide protection? Second, how will vaccine-rollout expectations and policy support affect activity? Third, how will financial conditions and commodity prices evolve? The baseline forecast requires forming a view on these unknowns.

The strength of the recovery is projected to vary significantly across countries, depending on access to medical interventions, effectiveness of policy support, exposure to cross-country spillover, and structural characteristic centering the crisis (Figure1).

Figure 1. Divergent Recoveries: WEO Forecast for Advanced Economies and Emerging Market and Developing Economies
(Index, 2019:Q4 = 100)

Source: IMF staff estimates.

Note: AEs = advanced economies; EMDEs = emerging market and developing economies; WEO = World Economic Outlook.

Infections and restrictions will soften momentum in early 2021. Third quarter GDP outturns mostly surprised on the upside (Australia, euro area, India, Japan, Korea, New Zealand, Turkey, United States) or were in line with expectations elsewhere (China, Mexico). Among components, private consumption rebounded the most. Investment picked up relatively slowly, except in China. The expenditure decompositions suggest a release of pent-up demand and adjustments to telework. Given the largely one-off nature of such spending, it is likely to dissipate once the adjustments are made. High-frequency data suggest some tapering into the fourth quarter of 2020 for example, in new orders, industrial production, and global trade.

The US December employment report also showed the first net decline in nonfarm payrolls since April 2020. Moreover, services output remains subdued and is likely to soften further in the coming months with renewed restrictions to combat rising infections. The softening in early 2021 is expected to give way to rising momentum in the second quarter as vaccines and therapies become more readily available, allowing contact-intensive activity to strengthen. Vaccines, therapies and containment efforts. The baseline assumes broad vaccine availability in advanced economies and some emerging market economies in summer 2021 and across most countries by the second half of 2022 an accelerated timeline relative to expectations at the time of the previous forecast. Vaccine rollout speed is assumed to vary across economies based on country-specific factors. Moreover, therapies are expected to gradually become more effective and more accessible worldwide over the course of 2021-22. The baseline also assumes the possibility of lockdowns, including to contain transmission of new variants, before vaccines become widely available. Additional fiscal policy support set to boost activity in some countries, but most are expected to experience lower deficits in 2021. The sizable fiscal support announced for 2021 in some countries, including most recently in the United States and Japan, together with the unlocking of Next Generation EU funds, will help lift economic activity among advanced economies with favourable spill overs to trading partners. However, as noted in the January 2021 Fiscal Monitor Update, fiscal deficits in most countries are projected to decline in 2021 as revenues rise and expenditures decline automatically with the recovery. Supportive financial conditions. Major central banks are assumed to maintain their current policy rate settings throughout the forecast horizon to the end of 2022. As a result, financial conditions are expected to remain broadly at current levels for advanced economies while gradually improving for emerging market and developing economies. Within this latter group, differentiation between investment-grade sovereigns (who have been able to issue external debt in large amounts in 2020) and high-yield borrowers (many of whom are constrained in their ability to take on additional debt and until recently have not accessed international markets during the pandemic) is expected to subside as the recovery takes hold. As noted in the January 2021 Global Financial Stability Report Update, markets remain upbeat about prospects for 2021, banking on continued policy support. Rising commodity prices.

Reflecting the projected global recovery, oil prices are expected to rise in 2021 just over 20 percent from the low base for 2020, but will still remain well below their average for 2019. Non-oil commodity prices are also expected to increase with those of metals, in particular, projected to accelerate strongly in 2021.

Global Growth

After an estimated 3.5 percent contraction in 2020, the global economy is projected to grow 5.5 percent in 2021 and 4.2 percent in 2022. The estimate for 2020 is 0.9 percentage point higher than projected in the October WEO forecast. This reflects the stronger than-expected recovery on average across regions in the second half of the year. The 2021 growth forecast is revised up 0.3 percentage point, reflecting additional policy support in a few large economies and expectations of a vaccine-powered strengthening of activity later in the year, which outweigh the drag on near-term momentum due to rising infections. The upgrade is particularly large for the advanced economy group, reflecting additional fiscal support mostly in the United States and Japan together with expectations of earlier widespread vaccine availability compared to the emerging market and developing economy group. Global trade. Consistent with recovery in global activity, global trade volumes are forecast to grow about 8 percent in 2021, before moderating to 6 percent in 2022. Services trade is expected to recover more slowly than merchandise volumes, however, which is consistent with subdued cross-border tourism and business travel until transmission declines everywhere.

Global activity will remain well below the pre-COVID, January 2020 WEO projections through the forecast horizon. The strength of the projected recovery varies across countries, depending on the severity of the health crisis, the extent of domestic disruptions to activity (related to the structure of the economy and its reliance on contact-intensive sectors), the exposure to cross-border spillovers, and importantly the effectiveness of policy support to limit persistent damage. Advanced economies, in general, have been able to provide expansive fiscal support to households and firms (direct tax and spending measures as well as equity injections, loans, and guarantees), and central banks have reinforced this with expanded asset purchase programs, funding-for-lending facilities, and, for some, interest rate cuts. Reflecting the strong policy support and the anticipated widespread availability of vaccines in summer 2021, the projected output loss compared with the pre-COVID forecast is relatively smaller for advanced economies than other countries. Recovery paths vary within the group, with the US and Japan projected to regain end-2019 activity levels in the second half of 2021, while in the euro area and the United Kingdom activity is expected to remain below end-2019 levels into 2022. The wide divergence reflects to an important extent differences across countries in behavioral and public health responses to infections, flexibility and adaptability of economic activity to low mobility, pre-existing trends, and structural rigidities entering the crisis. The 2021 forecast for the United States is revised up 2 percentage points relative to the October 2020 WEO projection, reflecting carryover from the strong momentum in the second half of 2020 and additional support from the December 2020 fiscal package. Similarly, the 0.8 percentage point upward revision to Japan's 2021 forecast is largely because of the additional boost from the fiscal measures introduced at the end of 2020. These upgrades are partially offset by downward revisions to the 2021 forecast for the euro area reflecting an observed softening of activity toward the end of 2020, which is anticipated to continue into early 2021 amid rising infections and renewed lockdowns. Emerging market and developing economies are also projected to trace diverging recovery paths.

Considerable differentiation is expected between China where effective containment measures, a forceful public investment response, and central bank liquidity support have facilitated a strong recovery and other economies. Oil exporters and tourism-based economies within the group face particularly difficult prospects considering the expected slow normalization of cross-border travel and the subdued outlook for oil prices. As noted in the October 2020 WEO, the pandemic is expected to reverse the progress made in poverty reduction across the past two decades. Close to 90 million people are likely to fall below the extreme poverty threshold during 2020-21. Across regions, vulnerabilities, economic structure, and pre-crisis growth trends, together with the severity of the pandemic and the size of the policy response to combat the fallout, shape recovery profiles. Notable revisions to the forecast include the one for India (2.7 percentage points for 2021), reflecting carryover from a stronger-than-expected recovery in 2020 after lockdowns were eased.

OVERVIEW OF THE INDIAN ECONOMY

The agglutination of supply disruptions, the health crisis, an unparalleled mass migration and a hostile global environment took a heavy toll on the Indian economy. A cyclical slowdown had preceded the pandemic, causing

real gross domestic product ("GDP") growth to register a sequential deceleration since 2017-18, which slumped into contraction under the onslaught of COVID-19. The combination of demand compression and supply disruption that took hold in its wake caused severe debilitating effects on the economy in Q1:2020-21.

Sensing the recovery gaining traction, equity markets became ebullient, with the BSE Sensex staging a V-shaped recovery and rising over 91 per cent by end-March 2021 from the lows of March 2020, buoyed by strong corporate performance in Q2 and Q3 of 2020-21, the roll-out of a massive vaccine programme, fiscal and monetary stimulus in place and surges of capital inflows. The prospects for the Indian economy though impacted by the second wave, remain resilient backed by the prospects of another bumper rabi crop, the gathering momentum of activity in several sectors of the economy till March, especially housing, road construction and services activity in construction, freight transportation and information technology (IT). Meanwhile, the activation of the production linked incentive ("PLI") scheme, spectrum auctions and considerable easing of financial conditions are helping to shape the turnaround. On the other hand, large and medium-scale industry, mining and quarrying and several contact-intensive sectors remain subdued.

The second advance estimate ("SAE") that were released by the National Statistical Office ("NSO") in February 2021 revealed that aggregate demand, measured by real GDP, contracted by 8.0 per cent in 2020-21. This is the first contraction experienced since 1980-81 and the severest ever. In fact, the contraction was of the order of 15.9 per cent in the first half of 2020-21 under the full brunt of the lockdown imposed to curb the transmission of COVID-19.

(Source: RBI)

Economic activities gained momentum in the first quarter of year 2021 got subsequently dented by the onset of the second wave of the pandemic. The recovery in domestic economic activity is turning increasingly broad-based, with the expanding vaccination coverage, slump in fresh COVID-19 cases and rapid normalisation of mobility. Rural demand is expected to remain resilient. The spurt in contact-intensive activities and pent-up demand will continue to bolster urban demand. The government's infrastructure push, the widening of the performance-linked incentive scheme, structural reforms, recovering capacity utilisation and benign liquidity and financial conditions provide conducive conditions for private investment demand. The Reserve Bank's surveys point to improving business outlook and consumer confidence. On the other hand, volatile commodity prices, persisting global supply disruptions, new mutations of the virus and financial market volatility pose downside risks to the outlook.

Chart 2: Quarterly Projection of Real GDP Growth (y-o-y)

Taking all these factors into consideration and assuming no resurgence in COVID-19 infections in India, the projection for real GDP growth is retained at 9.5 per cent in 2021-22 consisting of 6.6 per cent in Q3; and 6.0 per cent in Q4:2021- 22. Real GDP growth is projected at 17.2 per cent for Q1:2022-23 and at 7.8 per cent for Q2.

INDIA'S FINANCIAL SERVICES SECTOR

Wide-ranging financial sector reforms in India were introduced as an integral part of the economic reforms initiated in the early 1990s. Financial sector reforms in India were grounded in the belief that competitive efficiency in the real sectors of the economy will not be realized to its full potential unless the financial sector was reformed as well. Thus, the principal objective of financial sector reforms was to improve the allocative efficiency of resources and accelerate the growth process of the real sector by removing structural deficiencies affecting the performance of financial institutions and financial markets.

The main thrust of reforms in the financial sector was on the creation of efficient and stable financial institutions and markets. Reforms in respect of the banking as well as non-banking financial institutions focused on creating

a deregulated environment and enabling free play of market forces while at the same time strengthening the prudential norms and the supervisory system. In the banking sector, the focus was on imparting operational flexibility and functional autonomy with a view to enhancing efficiency, productivity and profitability, imparting strength to the system and ensuring accountability and financial soundness. The restrictions on activities undertaken by the existing institutions were gradually relaxed and barriers to entry in the banking sector were removed. In the case of non-banking financial intermediaries, reforms focused on removing sector-specific deficiencies.

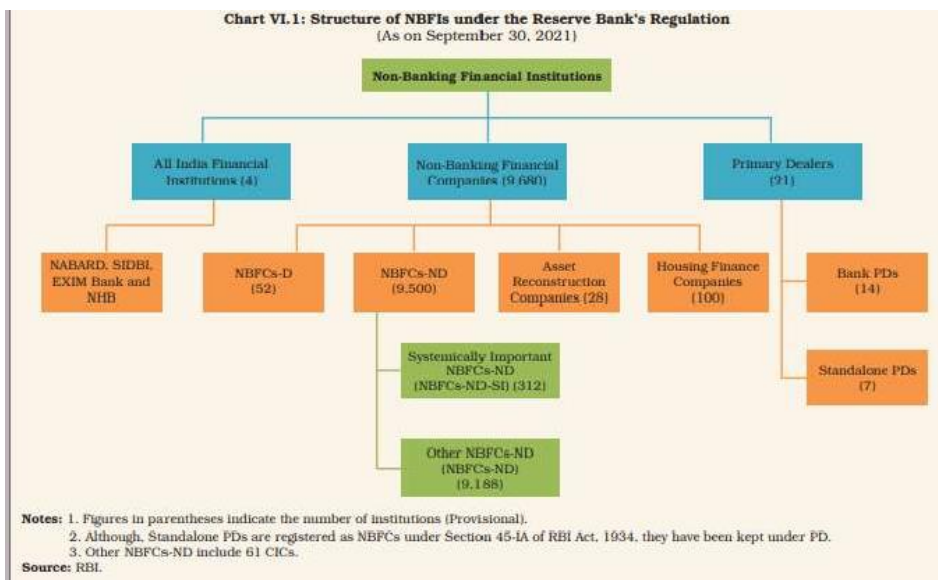

Non-banking financial sector grew rapidly, but there was no regulation of their asset side. Financial markets were characterized by control over pricing of financial assets, barriers to entry, high transaction costs and restrictions on movement of funds/participants between the market segments. Apart from inhibiting the development of the markets, this also affected their efficiency.

Reforms in financial markets focused on removal of structural bottlenecks, introduction of new players/instruments, free pricing of financial assets, relaxation of quantitative restrictions, improvement in trading, clearing and settlement practices, more transparency, etc. Reforms encompassed regulatory and legal changes, building of institutional infrastructure, refinement of market microstructure and technological upgradation. In the various financial market segments, reforms aimed at creating liquidity and depth and an efficient price discovery process.

Overview of the Non-Banking Financial Institutions

Non-Banking Lenders have witnessed exponential growth in the last decade driven largely by regulatory reforms and their ability to cater to unbanked areas through innovative products and service delivery mechanisms. This was further supported by their effective collection platforms. Today, non-bank lenders constitute about 25% (over INR 35.9 lakh crore as on Sept-2019) of the systemic credit outstanding and have financed over 10 crore customers drawing strength from their extensive footprint largely in rural and semi-urban areas (70% of total branches).

Non-bank lenders form an integral part of the Indian financial ecosystem. They provide underbanked/unbanked individuals and MSMEs an opportunity to be a part of the financial mainstream. They have been successful in bridging the credit gap for the entire spectrum of customers ranging from high ticket structured loans to corporates/HNIs to microfinance customers, due to their higher risk underwriting capacity, superior credit assessment skills and deep understanding of customers. They have emerged as a vehicle for financing business activities that Banks neglected due to regulatory restrictions such as credit exposure constraints and sector concentration norms.

Non-bank lenders collaborate with banks through various modes like securitization, on-lending, and business correspondents to complement credit dissemination by underwriting small ticket loans to the agriculture sector

and MSMEs. Over the years, non-bank lenders have also acquired a skill-based arbitrage over banks due to continuous innovation in their business model and processes that rely on surrogate non-financial information, use of third-party sales channels and collection processes.

Furthermore, non-bank lenders have gained market share from banks in key segments such as retail consumer loans, lending to micro small enterprises, vehicle loans and housing loans. They have been able to capture share by catering to underserved and unbanked customer segments.

CREDIT CONCENTRATION - NBFC

(Source: FICCI)

However, over the past two years, the non-banking finance sector came under stress due to multiple adverse events which impacted growth and profitability. COVID-19 has further amplified the stress in the system. Loan volumes for most of the non-bank lenders have come down considerably, particularly for lenders who are directly competing with banks and have limited pricing power.

Non-bank lenders continue to perform better than banks in terms of balance sheet growth and overall profitability. On relative terms, non-bank lenders can garner higher yields on their underlying assets than banks given their higher exposure to informal segments. Further, despite higher cost of funds, their net interest margins are higher translating into better risk-adjusted return (even after they operate at lower leverage vis-a-vis banks).

Non-bank lenders play an important role in the economy by financing micro and small-scale industries (informal sector) and provide employment and entrepreneurial opportunities at a ground level. Banks prefer lending to entities with stronger balance sheets or to lower risk segments such as the salaried class of people. Non-bank lenders support financially weaker sections of society by channelizing financial resources to capital formation. A large share of their assets (45%) is deployed into retail, MSME and vehicle finance segments.

Lending by NBFC-ND-SI

Amongst NBFCs-ND-SI, ICCs, IFCs and NBFCs-MFI together accounted for 98.1 per cent of the total asset size of the sub-sector in March 2021. All categories of NBFCs-ND-SI exhibited balance sheet growth in 2020-21, except for NBFCs-Factor. With the harmonisation of major NBFC categories, NBFCs-D now comprise only ICCs.

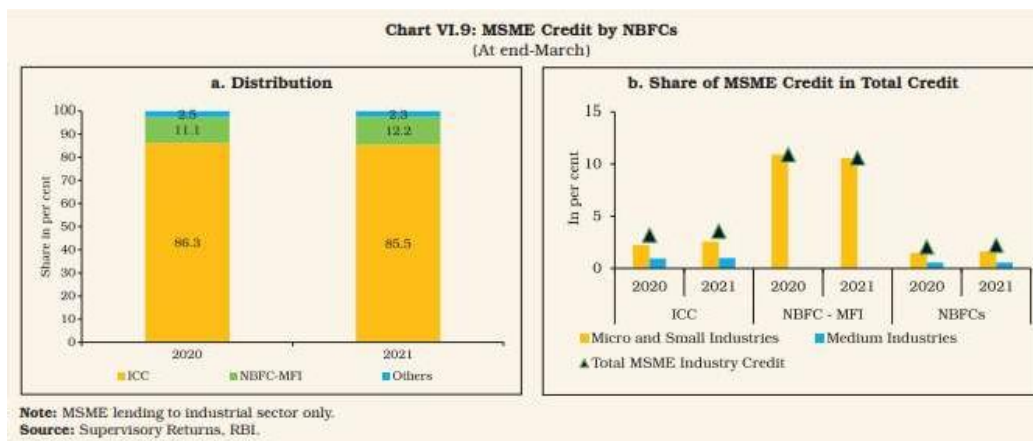

Industry remained the largest recipient of credit extended by the NBFC sector, followed by retail loans and services. In 2020-21, the share of the retail loan portfolio of the sector continued to rise with a concomitant fall in the share of services sector. ICCs and IFCs together comprise 96.2 per cent credit extended by NBFCs as of end-March 2021. The fall in the share of ICCs was primarily due to the strong growth of other two categories viz., IFCs and NBFCs-MFI (Chart VI.6 a & b).

The MSME sector was among the most pandemic afflicted sectors. Accordingly, the Reserve Bank and the Union Government introduced several measures to revive activity in the sector: a) special refinance facilities for AIFIs, which included Rs.15,000 crore to SIDBI for on-lending/refinancing to the MSME sector; b) Emergency Credit Line Guarantee Scheme (ECLGS) which provided Rs. 3 lakh crore of unsecured loans to MSMEs and business; c) extension of the scheme of one-time restructuring of loans to MSMEs without an asset classification downgrade; d) permitting bank lending to NBFCs (other than MFIs) for on-lending to agriculture, MSMEs and housing to be classified as priority sector lending (PSL); e) introduction of on-tap Targeted Long-Term Repo Operations (TLTRO) in October 2020 for reviving specific sectors, including MSMEs.

NBFCs' credit to MSMEs grew at 17.8 per cent during 2020-21. ICCs, together with NBFCs MFI, are the main purveyors of MSME credit (Chart VI.9.a). Eleven per cent of the NBFCs MFI' loan book comprises micro and small loans (Chart VI.9.b).

In view of the significance of the sector for income and employment generation, many regulatory policies to support the sector have been extended. The scheme of one-time restructuring of loans to MSMEs without an asset classification downgrade was extended in May 2021 and the exposure threshold was increased to Rs. 50 crore in June, 2021.

Further, during 2020-21, retail loan portfolios of banks outgrew their services sector lending, aided by double digit acceleration in housing loans- the biggest component of retail loans. Vehicle loans gained traction, reflecting consumer interest after companies announced substantial discounts on automobiles.

Vehicle loans credit, the largest segment in retail loans, witnessed reduction in share during 2020-21 owing to disruption of activity while the share of lending against gold doubled.

Vehicle financing is a niche area for NBFCs in which they still account for a predominant share. Component-wise, sales growth of commercial vehicles continued to be in the negative zone in 2020-21 while passenger vehicle sales picked up marginally aided by the opening up of the economy and a growing preference for personal vehicles. Tractor sales grew at a robust pace in 2020-21 as agriculture and rural areas were relatively insulated from the first wave and normal monsoon whetted activity. Consequently, NBFCs rebalanced their credit portfolios in favour of this section.

Impact of Covid-19 on Non-Banking Financial Sector

COVID-19 pandemic led to a slowdown in the economic activity across the globe. To curb the increasing infection, several countries-imposed lockdowns to a varying degree. Due to these lockdowns and the subsequent restriction in mobility, business across the world got impacted. One of the worst hit sectors the NBFC lending business.

According to the World Bank, the Global economy is estimated to have contracted by 3.5% in 2020. Advanced economies such as the US, Japan and European regions are estimated to have contracted by 3.5%, 4.7% and 6.6% respectively during the period. Compared to the advanced economies, the emerging market and developing economies ("EMDEs") showcased better resistance and were expected to have contracted by 1.7% during 2020.

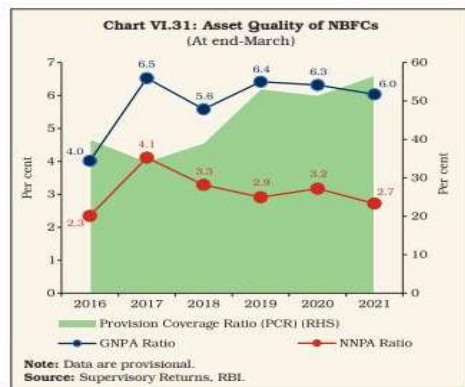

Due to interconnected nature of the economy and the cascading impact of reduced mobility, all the allied sectors of the economy got impacted. The fall in consumption pushed several businesses into distress leading to loss in productivity and jobs. Governments and Central Bank across the world came to the rescue with several measures, targeted at reviving the falling consumption.

The ongoing COVID-19 pandemic has deeply impacted the NBFC sector. In Q1:2020- 21, they faced severe disruptions during and in the wake of the nation-wide lockdown, leading to a standstill of economic activity and a contraction of GDP by 24.4 per cent. As the impact on the real sector spilled over to financial markets, NBFCs witnessed a sharp drop in collections and disbursements and a substantial increase in the cost of their borrowings even as access to market funding became restricted. The provision of moratorium also had an impact on their cash inflows, resulting in reduction in collections. Timely measures on monetary, fiscal, and regulatory fronts by the Reserve Bank and the government aided their revival, eased financial conditions and bolstered market sentiments. From Q2:2020-21 onwards, the situation improved, aided by policy support. Many NBFCs also recalibrated their business strategies, leveraging on digital technology with a strong emphasis on data analytics. The NBFC sector faced headwinds again when the second wave hit the country by March 2021. With the passing of the second wave, the outlook is brightening again; however, downside risks remain significant.

NBFCs have a competitive edge in their superior understanding of regional dynamics, well-developed collection systems and personalised services in the drive to expand financial inclusion in India. Lower transaction costs, quick decision making, customer orientation and prompt provision of services have typically differentiated NBFCs from banks. The reach and last mile advantages of NBFCs have empowered them with agility, innovation and a cutting edge in providing formal financial services to underbanked and unserved sections of the society.

Asset Quality of NBFC Sector

In 2020-21, NBFCs registered an improvement in asset quality as the asset classification standstill in view of the pandemic was in force. Resolution of a few accounts in the infrastructure space during the year also helped. Both GNPA and NNPA ratios declined post March 2020. The higher provision coverage ratio ("PCR") during the period is reflective of adequate buffers to deal with likely headwinds (Chart VI.31). In 2021-22 (up to September), asset quality of the sector deteriorated to some extent. GNPA ratio increased from 6.0 per cent to 6.8 per cent and NNPA ratio increased from 2.7 per cent to 3.0 per cent.

Based on the duration for which an asset remains non-performing, NPAs can be categorised into sub-standard, doubtful and loss assets. In 2020-21, a part of the sub-standard assets of a large NBFC returned to being standard, which led to a marginal improvement in asset quality (Chart VI.33).

Among performing loans of NBFCs, 87.6 per cent of loans were standard and rest were overdue but not NPAs in March 2021. Loans overdue in the first bucket viz., less than 30 days were the largest, but the position improved in 2021. The share of loans overdue for more than 60 days but less than 90 days doubled.

Profitability of NBFCs-ND-SI

The profitability of NBFCs-ND-SI gauged in terms of RoA marginally increased in 2020-21 due to an improvement in the RoA of IFCs. The overall RoE of NBFCs-ND-SI declined. NIM was lower for all entities, mirroring subdued credit off-take (Chart VI.30).

Support to Micro, Small and Medium Enterprises (MSMEs) by NBFCs

The MSME sector forms the backbone of the Indian Economy. It is a critical for the economic and social development of the country as it not only fosters entrepreneurship but also generates mass employment. MSMEs are complementary to large industries as ancillary units and this sector contributes significantly to the inclusive industrial development of the country.

India has 6.3 crore MSMEs operating in the country which contribute to 28.9% of the GDP while employing 11 crore people. With over 3 crore MSMEs (51% of total MSMEs) based in the rural areas, they form an important part of the rural ecosystem.

Of the overall MSME market of \$560 Bn, only \$232 Bn is currently under the ambit of formal lending sector. Remaining \$230 Bn is yet to be covered under the fold of formal lending. This points towards a wide opportunity that is waiting to be tapped. FinTechs which can leverage the power of alternative data sources to underwrite these customers will be able to break-open this evolving space.

Given their overall economic importance, easy access to credit for the sector is vital to ensure its growth. Exposure of banks and non-bank lenders to the sector increased by 75% since Financial Year 2014 to reach INR 18.3 lakh crore as in Financial Year 2020. Despite a jump, formal credit access through banks and non-bank lenders contribute to 49% of the overall credit requirement of MSMEs as shown below:

(Source: FICCI)

The growth of non-bank lenders in financing the MSME sector can be attributed to the following factors:

- a) **Efficiency in underwriting:** Between 2016 and 2018, all lenders effectively reduced the processing time for MSME loans. Accordingly, non-bank lenders have the lowest Turn Around Time ("TAT") in the

- industry for processing MSME loans.
- b) **Differentiated approach to MSME financing:** MSME creditworthiness assessment, more specifically for small and micro segments which have a higher proportion of customers with limited income proofs, requires a strong understanding of the sector and micro-market. Non-bank lenders underwrite based on the cashflows as opposed to a balance sheet-based approach. This approach requires significant investment in effective assessment, monitoring and collections. Consequently, the cost of servicing the segment is relatively higher. Hence, non-bank lenders with their strong network and underwriting capabilities are better placed to continue servicing this sector.

Alternative financing - a boon to emerging market like India

Alternative financing in India though it is yet to establish its roots in India; it is certain to give positive push to growth of the MSMEs. The key hurdle i.e. inaccessible timely credit at competitive cost which has been a major challenge faced by MSMEs over the past several years, the alternative platforms aim to provide simplified and customized access to finance along with more active participation and guidance in the overall growth and operations of the enterprises. Besides, in the era of rapidly changing technology, it is also essential for enterprises to overcome the risk of becoming technologically obsolete. Hence, alternative sources are expected to be the key drivers, providing convenient and cost-effective funding during the crucial stages of growth of the small and medium enterprises, thereby aiding sustainable growth. These alternative solutions are known to be popular among advanced countries suggesting that these alternatives are more likely to thrive if implemented in India as they help in bringing the borrowers and investors closer. However, these innovative methods would prove to be fruitful if established with strong legal framework involving greater transparency which would not only encourage borrowers but also build greater confidence among investors.

There have been several technology innovations that are changing the landscape of MSME lending. Some of these recent innovations include:

1. **India Stack:** India Stack refers to a set of open APIs that allows governments, businesses, start-ups, and developers to utilize digital infrastructure. It was launched in 2009 with the creation of UIDAI and represented the first major disruption in India's FinTech space. It offers open APIs as public infrastructure such as UPI, BharatPay, BBPS, Aadhar, AEPS, eKYC, eSign, Digi Locker, FASTag, and the GSTN platform. India Stack APIs allow governments, businesses, startups, and developers to utilize digital infrastructure to facilitate presence-less, paperless, and cashless service delivery.
2. **Open Credit Enablement Network (OCEN):** OCEN, launched as part of India Stack in July 2020, aims to change the way credit is distributed to the end-user by introducing new touchpoints for the distribution of financial services. It empowers digital platforms to play crucial roles in the lending value chain. It is a complete reimagination of the credit ecosystem in India. The launch of the Open Credit Enablement Network, or OCEN, was the definitive step for India to move towards democratization of credit and financial inclusion. OCEN as a credit rail will have a common language and connecting lenders and marketplaces allowing them to create innovative credit products and services on top of it. It is a strictly defined spec of APIs that acts as a standardizing middle layer between lenders and digital platforms
3. **Account Aggregator Framework (AA Framework):** Similar to Aadhaar or UPI, the take-off for AA is expected to be moderate and growth likely to accelerate with increase in use-cases. Strong growth will enlist new players with innovative use cases, thus creating a network effect. Customer service levels across lending, wealth management etc. are expected to meaningfully improve and good credit behaviour can be rewarded with a personalized product proposition.

These innovations along with other developments in the pipeline is expected to give necessary fillip not only to the lending fraternity but also the future of MSME Financing.

Role of Fin-tech and NBFCs to meet Financial Demands

Fin-tech lenders use digital technology to make lending faster, easier and less costly. Specializing in MSME finance, such companies work is all about granting a loan against financial statements, bank account transaction history or e-commerce transaction behaviour all of which can be digitally uploaded by the applicant borrower, within a matter of days and at an interest rate that is much lesser than the banks. The creditworthiness of the borrower is assessed using big data along with psychometric tests and social media behaviour. The trading position

of the business is also taken into account. Propelled by technological developments, an alternative source of loans for small business has emerged in the form of new FinTech financial technology lending.

Digital lending services build a bridge between lenders and borrowers. There is a difference in the time taken to process the application, the underwriting process, the actual disbursement of the amount and the period for which the MSME loan is granted. While adequate care is taken in evaluating the eligibility of a business for the grant, a FinTech company also ensures that there are no superfluous delays.

It helps the MSMEs on the following accounts:

Unconventional approaches: Instead of scanning through numerous irrelevant documents and looking at documents that are known to be under-reported, online lenders make use of credit scorecards as well as several hundreds of variables and raw data points. Some also conduct psychometric analysis of candidates and include industry proxies, financial behaviour, and non-traditional metrics for overall assessment. This lays the foundation for them to provide collateral-free loans to MSMEs even with easily provided documentation something not widely visible within the formal banking institutions.

Technological advantage: Digital lending platforms make use of cutting-edge algorithms in their loan assessment process. Banking on AI and Big Data, to analyse the applicant, the business, and the market that it caters to in order to ensure continuous improvement of credit models. Some of the platforms have combined strong underwriting experience with technology to create truly powerful solutions. In fact, Online lending marketplaces are even power some of the traditional Financial Institutions ("FIs") platforms now through PaaS Platform-as-a-Service solutions to enable them to do faster and more accurate credit assessment.

Minimal human intervention for quick assessment: Such platforms rely on entirely digital processes with minimal or no human intervention in the overall decision making. This eliminates the scope of human errors and makes assessments thoroughly reliable and unbiased. While, it greatly improves the velocity of credit processes it also makes credit underwriting much more scalable. Owing to their innovation-driven approach, the turnaround time for credit risk assessment has been brought down to a few minutes against days and weeks as is the norm in traditional FIs.

Easy application process: The use of bots and specifically designed algorithms enable digital lending platforms to scrape all the relevant information from public and private sources. This facilitates minimum paperwork during application and obviates the need for the applicant to fill exhaustive forms.

Loan disbursement: Digital lending companies have improved the user experience by leveraging technology to tone down the paper work and processing time. Just like retail shopping and online travel bookings, the capital market for MSMEs also needed to evolve and move online. The loan disbursement process takes only about - days which proves to be pivotal for cash-strapped MSMEs. 35% of the MSMEs receive payments months or later after delivering products or providing services making quick access to working capital essential for smooth functioning and gradual scaling up of MSMEs.

Digital lending is helping a new class of business borrowers who have not been able to obtain funding from traditional sources. With an automated underwriting process and risk management, it has a lower operational cost and smoother loan processing. A major of Fin-Tech -based lending is the assessment of client's credit worthiness. Unlike banks that use only income statements and formal credit history, a Fin-Tech company gathers substantial data through social media and big data. What's more, with a strong use of technology in lending, the focus on safety is also uncompromising. There are adequate measures to keep the customer details encrypted and secure. Moreover, they also facilitate tailored finance products keeping in mind the varying needs of different industry segments.

Most of digital lending platform are focusing on providing unsecured loans to MSMEs which has been the need of the hour as many SMEs with high potential suffer from capital starvation and are unable to take out loans from traditional FIs due to the focus on secured loans. It's an unsecured loan disruption that digital lenders are bringing in powered with technology to risk assess the borrowers in a much better manner and lend against the business performance and track record rather than value of a collateral. As a larger segment of the population comes under the digital aegis, the future prospects of the MSME segment driven by swift and efficient financial assistance enabled by the digital lending ecosystem will only herald positive tidings for the long-term growth of the Indian

economy.

As a conclusion it can be safely said that the emergence of the Fintech NBFC for MSME finance is a global phenomenon that is transforming the entire lending model and in turn the business sector in totality. An idea can change the world, and as fast the idea can be converted into reality, more profitable and effective it will be. Gone are the days of the waiting in line for form fill-ups and waiting months to get a loan to have your business see the light of the day. With players in the market, monetary support for your innovative business idea is just a click away.

FinTech Regulations

In a recent discussion on Responsible Digital Innovation, RBI hinted towards the upcoming FinTech regulations while discussing about responsible digital innovation.

RBI believes that the regulation has to be based on the entity type rather than the earlier followed approach of activity-based regulation. Systemic risks, operational risks and risks affecting competition are of prime importance when dealing with large financial market infrastructure entities or bigtech. Countries need to overcome the legislative and regulatory deficits in dealing with concerns surrounding privacy, safety and monetisation of data. Regulations pertaining to data issues needs to adapt to a world where boundaries between financial and non-financial firms is getting increasingly blurred or geographical boundaries are no longer a constraint.

Given the fast-evolving landscape of financial value chain and the blurring lines between financial and non-financial firms, the regulators might need to dampen the pace of innovation to ensure better customer protection.

Gold Loan

Gold has occupied a special place in the socio-economic milieu of India. It is considered to be an important asset, a hedge against inflation and an immediate source of cash especially for the rural households in India. Gold is used as collateral to earn money for short term needs. Due to an emotional attachment to the gold that households have, most of households do not sell gold ornaments; instead they pawn it for immediate use. As it a liquid asset, Indian households prefer to possess it so that it can be useful during times of crisis.

In India, gold is considered to be a sign of social status, financial security and cultural legacy. As of 2019, households in India assembled about 25,000 tons of gold, making the country the largest holder of the yellow metal in the world. Rural communities account for ~65% of the total gold demand in the country.

Owing to the sentimental value that Indians associate with this indispensable item, people seldom sell it to meet financial emergencies. They prefer to pledge gold as collateral to secure short-term loans. Gold loans enjoy a relatively low-interest rate that varies between 9.5% and 24% and have a flexible tenure (ranging from a few days to 5 years). The organized gold loan market comprises of banks (private, public, small finance and co-operative), NBFC and Nidhi companies which contribute nearly 35% of the gold loan market in India

The gold loan market in India was valued at ~INR 2,921.42 Bn in 2019 and is expected to reach ~INR 6,275.40 Bn by 2025, expanding at a compound annual growth rate ("CAGR") of ~12.75% during the 2020-2025 period.

Vehicle Loan

As in many other markets, a majority of vehicles – two-wheelers, passenger cars and commercial vehicles – that are sold in India are bought by consumers with automobile loans. About 75 per cent of cars in India are bought through loans, whereas the figure for commercial vehicles is as high as 90 per cent.

As an indication of improving sentiments, more people in the country are now borrowing to purchase new vehicles. With the pickup in economic activities and rising demand and rates for goods transport, fresh auto loan disbursements by NBFCs have almost touched the pre-COVID levels in the first half of FY22.

Data provided by the Finance Industry Development Council ("FIDC"), shows that in H1 FY22, loans worth INR 63,669.84 crore were disbursed to the auto sector compared to INR 43,564.77 crore in the same period a year ago,

up 46.15%. A sequential reduction in gross NPA was also seen quarter-on-quarter.

Small Business Loan

The importance of the MSME sector in India cannot be emphasized enough. Providing employment to about 120 million people, contributing about 30% of our gross domestic product (through manufacturing and service activities) and 45% of overall exports, MSMEs are crucial for promoting inclusive growth and encouraging innovation. In this context, nano-enterprises hold a special place. These are snacks counters, catering services, beauty salons, fashion boutiques, kirana stores and the like.

Micro, Small and Medium Enterprises (MSMEs) have been one of the strongest drivers of growth, entrepreneurship and employment in the Indian economic growth story. The sector accounts for 30% of the GDP, 48% of the total exports and 95% of the industrial units in the country. In terms of employment, it employs 40% of India's workforce.

The overall debt supply to the sector are met through informal and formal source. Debt supply from NBFCs to the MSME sector have increased considerably. NBFCs have been increasingly turning to MSMEs as an avenue for growth based on the higher margins of the sector and inadequate bank service penetration to the sector. Banks usually have a spread of 4 percent 5 percent, but NBFCs can charge higher interest on loans and can thus have spreads as high as 8 percent MSMEs are willing to pay higher rates to NBFCs because they are able to disburse loans faster and more efficiently and have tailored their marketing campaigns to the sector more closely than banks.

Our Business Strategy

Maintain and Expand Long-term Relationships with Clients

Our Company believes that business is a by-product of relationship. The business model is based on client relationships that are established over period of time rather than a project-based execution approach. Our Company believes that long-term client relationship fetches better dividends. Long-term relations are built on trust and continuous satisfaction of the customers. It helps understanding the basic approach of our Company, its products and its market. It also forms basis of further expansion for our Company, as we are able to monitor a potential product/ market closely.

Leveraging of our Marketing Skills and Relationships

We continue to enhance our business operations by ensuring that our network of customers increases through our marketing efforts. Our core competency lies in our deep understanding of our customers’ buying preferences and behavior, which has helped us in achieving customer loyalty. We endeavor to continuously improve the product mix offered to the customers as well as strive to understand and anticipate any change in the expectation of our clients towards our products.

Diversified credit profile, strong credit evaluation and risk management systems

We seek to diversify our credit risk and ensure that no individual credit product contributes a large portion to our overall credit book. We believe that this mitigates the risk of concentration to any particular product or sector and helps us to manage our risk exposure in a more effective manner.

Diversify our assets and liabilities

We intend to remain diversified in our loan book by strategically focusing on adjacent high growth and profitable lending businesses and further expand our lending and other businesses. We intend to continue to focus on developing a diversified funding model to achieve optimal cost of funds while balancing liquidity and concentration risks. As our cost of borrowings is determined by our financial discipline and business performance, we intend to source funding at competitive rates. In particular, with respect to our credit business, a decrease in cost of borrowings will enable us to price our products in a more competitive manner. We intend to further diversify and strengthen our profile, strategically adding additional funding resources.

Growth of the business through increasing geographical presence across India

We intend to continue to grow our loan portfolio by expanding our network through the addition of new branches. A good reach to customers is very important in our business. Marketing

We have dedicated marketing teams who cater to the demands of the customers and ensure that tailor made solutions are offered to attract and retain the customers.

Competition

We face competition from organized as well as unorganized players in the domestic market. The financial services industry is highly competitive and we expect competition to intensify in the future. We face competition in the lending business from domestic and international banks as well as other NBFCs, fintech lending platforms and private unorganized lenders. Banks are increasingly expanding into retail loans in the rural and semi-urban areas of India. We are exposed to the risk that these banks continue to expand their operations into the markets in which we operate, which would result in greater competition and lower spreads on our loans. In particular, many of our competitors may have operational advantages in terms of access to cost-effective sources of funding and in implementing new technologies and rationalising related operational costs.

Employees

We invest in developing our talent and leadership through various initiatives aimed at strengthening the ability of our managers to bring together people, strategies, and execution to drive business results.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India including the Indian Accounting Standards ("Ind AS") prescribed under section 133 of the Act, of the state of affairs of the Company as at March 31, 2021, its profit (including other comprehensive income), changes in equity and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit in accordance with Standards on Auditing (SAs) specified under section 143(10) of the Act. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India ("ICAI") together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion on the financial statements.

Key Audit Matters

We have determined that there are no key audit matters to communicate in our report.

Other Information

The Company's Board of Directors is responsible for the other information. The other information comprises the information included in the Management Discussion and Analysis, Director's Report and Corporate Governance Report, but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management (Consolidated) and Those Charged with Governance for the Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the financial position, financial performance (including other comprehensive income), changes in equity and cash flows of the Company in accordance with the accounting principles generally accepted in India, including Ind AS prescribed under section 133 of the Act, read with the Companies (Indian Accounting Standards) Rules, 2015, as amended. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Consolidated financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements. As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal controls.
- Obtain an understanding of internal financial controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Annexure “2” to the Independent Auditor’s Consolidated Report

[Referred to in paragraph 2(f) under ‘Report on Other Legal and Regulatory Requirements’ section of our Independent Auditor’s Report of even date to the members of Advik Capital Limited & Advik Opto Electronics Ltd on the statements for the year ended March 31, 2021]

Report on the Internal Financial Controls with reference to Financial Statements under clause (i) of sub-section 3 of Section 143 of the Companies Act, 2013 (“the Act”)

We have audited the internal financial controls with reference to Consolidated financial statements of **ADVIK CAPITAL LIMITED (“the Holding Company”) and ADVIK OPTOELECTRONICS LIMITED (“the subsidiary Company”) together referred as “the Group” for the year ended on 31st March, 2021** in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Management’s Responsibility for Internal Financial Controls

The Company’s management is responsible for establishing and maintaining internal financial controls based on the internal control with reference to financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the “Guidance Note”) issued by the Institute of Chartered Accountants of India (“ICAI”). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to Company’s policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditor’s Responsibility

Our responsibility is to express an opinion on the internal financial controls over financial reporting of the Company based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the “Guidance Note”) issued by the Institute of Chartered Accountants of India and the Standards on Auditing prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness.

Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk.

The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls with reference to financial statements.

Meaning of Internal Financial Controls with reference to Financial Statements

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls with reference to Financial Statements

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, adequate internal financial controls with reference to financial statements and such internal financial controls with reference to financial statements were operating effectively as at March 31, 2021, based on the internal control with reference to financial statements criteria established by the Company considering the essential components of internal controls stated in the Guidance Note issued by the ICAI.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991, of the Government of India and FEMA. While the Industrial Policy, 1991, of the Government of India, prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. The Union Cabinet, as provided in the Cabinet Press Release dated May 24, 2017, has given its approval for phasing out the FIPB. Under the Industrial Policy, 1991, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Accordingly, the process for foreign direct investment ("**FDI**") and approval from the Government of India will now be handled by the concerned ministries or departments, in consultation with the Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (formerly known as the Department of Industrial Policy and Promotion) ("**DPIIT**"), Ministry of Finance, Department of Economic Affairs, FIPB section, through a memorandum dated June 5, 2017, has notified the specific ministries handling relevant sectors. The Government has, from time to time, made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated FDI Policy Circular of 2017 ("**FDI Circular 2017**"), which, with effect from August 28, 2017, consolidated and superseded all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as on August 28, 2017. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Circular 2017 will be valid until the DPIIT issues an updated circular.

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases which are notified by RBI as amendments to FEMA. In case of any conflict between FEMA and such policy pronouncements, FEMA prevails. The Consolidated FDI Policy, issued by the DIPP, consolidates the policy framework in place as on August 27, 2017, and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on August 27, 2017. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore the Consolidated FDI Policy will be valid until the DIPP issues an updated circular.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company falls under the automatic route as provided in the FDI Policy and FEMA and transfer does not attract the provisions of the SEBI Takeover Regulations; (ii) the nonresident shareholding is within the sectoral limits under the FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI and RBI.

As per the existing policy of the Government of India, erstwhile OCBs cannot participate in this Issue.
